

Station Name:	Streetcorner
Company:	Nash Records
Primary Purpose:	To promote Mark Nash's music.
Secondary Purpose:	To promote Mark Nash's music and video projects.
Tertiary Purpose:	To promote creative music projects from anyone from spoken word to jazz to hip hop to gospel with emphasis on creative inspirational art, independent record labels, and those smaller record labels that need assistance getting the word out about their music especially indie artists.
Station Type:	Internet/Streaming (No On Demand Service) When you surf on to my website, www.markanash.com, you get whatever the current song that is playing. The music is set to automatically play.
Streaming Hours:	24 hours/day 7 days/week (No show blocks. All music just keeps playing in the order inserted.
Broadcast Stream:	CD Quality - 128 kbps
Scheduled Server Downtimes:	None. I am able to add additional music on the fly. There are from time to time server maintenance from the hosting company, but no scheduled downtimes/maintenance schedules.
Logging:	I do not do any logging with any royalty companies. I primarily promote my music and/or shenanigans and independent record labels and artists.
Artist Advertising:	If you send me a radio commercial on cd in mp3 format or email me the file and indicate where people can buy your cd, then I can load it onto the server to further assist you in promoting your cd. If you ask and I have time, I can do a quick commercial for you, but it will be a very basic commercial. You will need to send me the details such as your stage name and where people can buy your cd as well as the track that you want as your background music. I am always busy so I will get to it whenever I get to it and the quality will be reasonable.
Outside Advertising:	Currently, I do not have any outside advertisers, sponsors, or promoters. I have considered this option recently, but have decided that I prefer non-commercial music. Not only that, not enough revenues and the company just overwhelms my listeners with ads, but does not share the revenue. Lol..I may consider doing commercials myself, but for now, I would prefer that you self promote and send me the file so the people can hear directly from you what you are doing. Understand, however that if there is any revenue from such efforts, it is not likely that I will distribute any to any artists. The win-win situation is that, as an independent artist or record label, you will have the opportunity to get assistance to promote your cd to the world and maybe I will receive some revenues to help pay for my projects. You may send an e-mail or written letter to remove your music from the Streetcorner server at any time. I created the station for me to share my music with the world as I am not optimistic that I will ever make it onto a traditional radio station. Lol...So it is all about me, buuuuuut because it takes me so long to drop a new album about 4 to 6 years between projects, I figured that I would share the love.
Demographics:	The majority of listeners are from Germany, with the second being the United States, but because it is the internet, listeners log in from all over the world from Poland to Japan.
Average Listeners: Radio	25 hits/hour; 44 hits average per day; 1,000 visitors minimum per month. (The numbers listed are from 2009 when I first wrote this document, the number is a lot higher than that so just use these as

	the minimum number of people who may hear your music.)
